Product information:
Cyclone. Innovation and Design

VOLO
The power to lift brands.

From a natural phenomenon to tent design

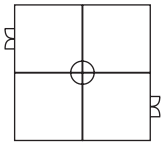
New design
Straight lines create an elegance, glass walls for a sophisticated and contemporary look. High-quality practical flooring. A modern twist with individuality. This is the Cyclone.

New perspective
Cyclone - a trendsetting design that provides a breath of fresh air for any event. Thanks to its architecturally unique shape, this mobile tent solution always attracts attention: clear lines, side heights of 2.70 m and a one-of-a-kind roof provide a new fururistic appearance from all four elevations. Space age design awaits inside taking you to a new dimension.

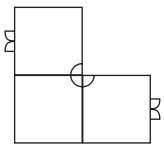
VOLO

The power to lift brands.

- Cyclone quatro (4)

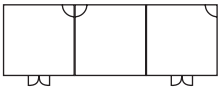


- Cyclone esquina (3)

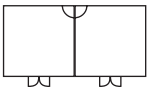


- Cyclone onda (4)

- Cyclone gamma (3)



- Cyclone duo (2)



- Cyclone mono (1)

New design options

The Cyclone features a flat roof which inclines towards one corner. At this point, the roof surface narrows like a cyclone downwards with a slightly increasing side curvature. The drainage runs through here.
A great idea. Combine several Cyclones and create a unique landscape of tents, making your event sophisticated with an air of originality. Take advantage of the new shapes when doing so: duo, gamma, odna, esquina or the complete funnel version quatro. Use the individual design options to give your event a personal note. Innovation with trendsetting design. Cyclone.
